

Combustion Technologies Inc Pistons

Combustion Technologies manufactures some of the highest quality pistons in the world. All pistons are produced from high strength Aluminum Alloy forgings. CNC equipment is utilized in 95% of all machining operations which are all performed in house. The majority of these pistons are used in aircraft applications, but some are installed in race cars traveling 190 mph+.

Textron Lycoming engines used on Airboats. This piston is a ASC10207

Pratt & Whitney R985 Wasp Jr installed on a Beech Staggerwing

Pratt & Whitney R1340 Wasp installed on North American AT-6 used by Aeroshell Acrobatic Team.
