

Combustion Technologies Inc Seal Rings

Combustion Technologies manufactures Seal Rings for many different applications. Some are installed in jet engines and some in artillery guns used by our armed forces. Most are produced for use in aircraft. They range in size from .625" dia to 8" dia in materials such as bronze, ni-resist, cast iron and stainless steel.

The Boeing 727 utilized the Pratt & Whitney Aircraft JT8D series engine.

Air Tractor AT-401B powered by the Pratt & Whitney R1340 Wasp radial engine

The F-15 Eagle utilizes the Pratt & Whitney F100 afterburning engine series
